DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- 1. Group I: claims 12-19 and 22 drawn to a peptide having at least about 75% amino acid homology with the sequence shown in SEQ ID NO: 2.
- 2. Group II: claim 20 drawn to a peptide having the amino acid sequence shown in SEQ ID NO: 5.
- 3. Group III: claim 21 drawn to a peptide having the amino acid sequence shown in SEQ ID NO: 6.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature of Group I is a peptide having at least about 75% amino acid homology with the sequence shown in SEQ ID NO: 2. The technical feature of Group I is anticipated by Ventura et al. 2002 "Identification and characterization of novel surface proteins in Lactobacillus johnsonii and Lactobacillus gasseri." Appl. Environ. Microbiol. 68:6172-6181. Ventura et al teach a peptide having at least about 75% amino acid homology with the sequence shown in SEQ ID NO: 2 (see STIC RESULTs SEQ ID NO: 289).

- 4. The special technical feature of Group II is a peptide having the amino acid sequence shown in SEQ ID NO: 5.
- 5. The special technical feature of Group II is a peptide having the amino acid sequence shown in SEQ ID NO: 6.

Application/Control Number: 10/576,982

Art Unit: 1645

Group II-III lacks unity with Group I because they do not have the same technical feature for Group I (as set forth supra). Therefore an assessment cannot be made whether there is a technical feature common to all groups that is "special" within the meaning of PCT Rule 13.2 and that makes for a contribution that the claimed invention makes over the prior art.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nina Archie whose telephone number is 571-272-9938. The examiner can normally be reached on M-F 8:30am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's acting supervisor, Bruce Campell can be reached on 571-272-0787. The fax phone

number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
